

SBSD Supported Hardware & Software

Last Edited 2/22/13, 4/22/15

What does “Fully Supported” mean?

- The hardware or software will function appropriately on the SBSB network.
- The hardware or software will be supported by the vendor.
- IT and ITE will provide assistance with use of the item and will maintain a solid working knowledge of the item. This is not to say that IT and ITE will be experts in the very advanced features of an item, but they will make reasonable efforts to support any use of an item.
- Proposed purchases of items on the “Fully Supported” list will not be automatically approved—they will be subject to a review of the appropriateness of the purchase to the user’s desires/needs—but they will not be subject to an extensive review process.

What does “Approved with Limited Support” mean?

- IT and ITE believe the hardware or software will function appropriately on the SBSB network.
- IT and ITE will provide limited assistance with use of the item and will maintain a rudimentary working knowledge of the item, at best.
- Proposed purchases of items on the “Approved, but Limited Support” list will not be automatically approved—they will be subject to a review of the appropriateness of the purchase to the user’s desires/needs—but they will not be subject to an extensive review process.

What does “Pilot/Review” mean?

- IT and ITE believe the hardware or software will function appropriately on the SBSB network, but items on this list are being or may be evaluated for how well the items function and their value to the District’s educational program.
- IT and ITE will provide limited to no assistance with use of the item initially, but will provide a greater level of support as they develop increasing levels of expertise.
- Proposed purchases of items on the “Pilot/Review” list will be subject to a more extensive review of the appropriateness of the purchase to the user’s desires/needs than items on the “Fully Supported” or “Approved, with Limited Support” lists.

What does “User-Supported” mean?

- IT and ITE believe the hardware or software will function appropriately on the SBSB network.
- IT and ITE will provide very limited to no assistance with use of the item. The user is expected to be self-sufficient in the use of the item.
- Proposed purchases of items on the “User-Supported” list will be subject to a more extensive review of the appropriateness of the purchase to the user’s desires/needs than items on the “Fully Supported” or “Approved, with Limited Support” lists.
- Items that are to be discontinued by the vendor or phased out by the District.

Discontinued = No longer can be purchased

Supported Hardware List

Fully Supported	Operating System/Version	Supported Uses/Description	Notes
Chromebooks	Chrome OS Ver 41+	Google Apps and approved extensions	Include ITE
DLP Projectors	Contact IT for Model	Projection	
Document Cameras	Contact IT for Model	Projection	Include ITE
